

System Requirements for Amik Streaming

The following operating systems and browsers are known to be compatible with current industry-standard web security protocols as implemented at Amik Streaming, when both system and browser are at supported levels and available updates have been applied to both.

Unsupported products or levels, may work, or may refuse to show or activate the player window, or may refuse to load the web page at all.

Supported Operating System/Devices

- Windows XP SP3 or newer (i.e Windows Vista, 7,8,10,11+)
- MacOS 10.12.1 and newer
- iOS 10 and above (generally this means iPhone 5 or newer as long as it has been updated)
- Android 7.1.1 and newer
- Linux - Debian 8 or Ubuntu 12.04 or newer

Supported Web Browsers (must be installed on one of the operating systems above)

- Mozilla Firefox Web Browser version 50 or higher
- Microsoft Edge - latest version for your operating system
- Apple/Mac Safari - latest version for your operating system
- Google Chrome - latest version for your operating system
- Other web browsers may also work as well but have not been tested
